Advancement of Science**

# ARTIFICIAL INTELLIGENCE: THE GOOD, THE BAD AND THE UGLY

Artificial intelligence is spearheading the fourth industrial revolution and challenging the role of humans in the development of technology. Unlike in the case of other technological advances, this raises several ethical issues ranging from potential job losses and possible undermining of privacy to wealth distribution among others. This symposium aims at discussing some of these issues with a view to helping us think of more considered decision making when moving forward.

*Symposium will be held in Hybrid mode*

Our Speakers:

**DR. VINOTH RAMACHANDRA**

Advisory Associate of the  
Faraday Institute for Science  
& Religion, Cambridge, UK

**DR. RUVAN WEERASINGHE**

Senior Lecturer  
University of Colombo  
School of Computing

**DR. ROMESH RANAWANA**
